Docker for "Reproduce to Validate: a Comprehensive Study on the Reproducibility of Economics Research"

Author: Lars Vilhuber 🆔0000-0001-5733-8932

> Prepared for Canadian Journal of Economics.

This repository contains an extract of the larger repository for the project "Reproduce to Validate: a Comprehensive Study on the Reproducibility of Economics Research". The full repository is available at https://github.com/larsvilhuber/aej-applied-replications-public/tag:v2024-04-12, and which is archived in its entirety at https://doi.org/10.5683/SP3/GJVVLI.

This deposit only contains the Docker-relevant files, but adds an archive of the image itself as last used.

Creation

The image can be created as

```
./build.sh
```

Extracting the image

The image contained in this deposit was created as

```
. config.sh
docker save -o ${repo}_${tag}.tar ${space}/${repo}:${tag}
```

Loading the image

The image can be loaded as

```
. config.sh
docker load -i ${repo}_${tag}.tar
```

References

The image was constructed based on `rocker/verse:4.2.2`.

License

The Dockerfile is licensed under the modified BSD License. The image itself is licensed under the terms of the `rocker/verse` image. Anything else that is not software is licensed under CC-BY-NC. See LICENSE.txt for details.
